Over the years, I had met and done numerous interviews/discussions/meetings with other solar companies and none of them piqued my interest nor did I get a sense of a 'trust' feeling (if you know what I mean) until David. Everything fell together without a hitch—from contract signing, design of the system and submission to the County for approval, to installation and final County inspection. And lastly, turning on the switch for my complete reliance on solar, all this in a 4 week period. Incredible job and well done! Thank you, David, for all you did to make it happen.

David, owner of O'Hara Solar, is one of the most honest, professional and knowledgeable people in the solar industry. He has the interest of the homeowner as his priority at all times. If you're looking to save money on your constantly rising electric bill, call him soon. He's the best.

Most knowledgeable person I've met when it comes to solar. Even more important, when I had a question O'Hara and associates didn't immediately know the answer to, they told me they'd find out. No guess work here, just good ole truth and commitment. Recommend this trustworthy crew. Especially David, he would go out of his way to service me and my wife.

My wife and I were tired of paying hundreds of dollars to SoCal Edison, especially with the extreme heat we've experienced the last several years. After speaking with a colleague who had used David from O'Hara Solar to install their solar system, I had to give him a call to see how much I could save. He was very much my solar teacher and educated me on all the questions I had. Following an effortless process of roof repair, solar panel and battery installation and activation with Edison, we were saving money and got a federal tax rebate for purchasing our solar system! David is a must have when making the change to solar energy to power our home!

This Company and David did exactly as he quoted. They were always on time and very professional during installation. They even lowered the price because of finding a better way. I would trust David in any business venture.
